

PSyclone tutorial

- PSyclone is already installed on the VM you have downloaded
- The tutorial uses Jupyter notebooks
- If you're not familiar with jupyter notebooks then just keep clicking the run button to work through the steps and follow the instructions

ESIWACE2 has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 823988

esiwace
CENTRE OF EXCELLENCE IN SIMULATION OF WEATHER
AND CLIMATE IN EUROPE

PSyclone tutorial

1. Open a terminal
2. `> cd ds1s/dsl-training`
3. `> git pull`
4. `> . start.sh`
5. `> cd psyclone/tutorial`
6. `> jupyter-notebook introduction.ipynb`

Enjoy!
